

Feel Create Act in a circular way

NATURE IS THE ORIGIN OF OUR ACTIVITY AND OUR SOURCE OF INSPIRATION. THAT'S WHY WE RESPECT IT THROUGHOUT THE ENTIRE MANUFACTURING PROCESS.

2024

CATALOGUE

ASTIGARRAGA

hit line

WE ARE NATURE

REDUCTION OF CARBON FOOTPRINT

We monitor our carbon footprint and act accordingly to reduce it for the global good.

BIOMASS

We practice energy self-sufficiency, generating heat by burning biomass from the waste we generate in our manufacturing processes.

A sustainable manufacturing process

At Astigarraga Kit Line we take care of what we love most: our environment. Our forests are the lungs of our activity and that is why we promote their care and reforestation. We control the entire manufacturing chain, in a circular process that begins and ends with the planting of insignis pine trees, guaranteeing respect for the environment. In this way, we fell, saw, dry, machine, package and ship our natural furniture in an entirely local way, with control of the production process and synergies between local companies that help to maintain the future of the forests.

We care for our environment

One thing that characterises us as a company is our commitment to caring for nature. All the wood that we work with is local, sustainable and controlled, which has enabled us to be PEFC certified since 2005.

Our commitment goes further

Our responsibility is not limited to reforestation or controlled production. At Astigarraga Kit Line, we enjoy designing and manufacturing solid pine wood furniture at a reasonable price. We respect nature, and we pay attention to every detail throughout the production process. Our commitment is not only to our environment, but also to the customer, with work that begins in the forest and ends with the satisfaction of our customers when they receive the final product.

We are Ecolabel

We contribute transparent criteria to a sustainable economy by providing consumers with accurate and reliable information on the environmental performance of labelled products. This is certified by the European Commission with the Ecolabel certificate.

70% RECYCLED PLASTICS

In addition to reducing the use of plastics in our packaging, we have achieved a 70%.

RECYCLED CARDBOARD

The cardboard we use in our packaging is made from 100% recycled material.

TRADITION

FAMILY VALUES

The surname Astigarraga is the origin of our company. We started as a small, family-run local factory. However, today, Astigarraga symbolises much more than that.

Every day more and more people work with us, sharing a connection based on common values. Spending just a few minutes talking to the people who make up our team is enough to understand the passion with which they embrace the natural environment that surrounds them, the dedication they put into their work and the commitment that binds them to their clients. All this is reflected in each Astigarraga Kit Line product.

They are authentic, simple and environmentally friendly products. This is the secret that ensures that, year after year, they remain as fresh and timeless as ever.

VOCATION

PASSION FOR CUSTOMER SERVICE

We have almost 40 years' experience in the DIY sector, and we are European leaders in the manufacture of wooden trestles. As a result, in our catalogue, you will find all kinds of products for organisation, with a young and innovative design that stands the test of time. Our goal is excellence in customer service. And we work for and with our customers. So that they can transform a home, office or work area into a more responsible space. With quality, and design. We're betting on the future.

I

FUNCTIONALITY AND AESTHETICS

TRESTLES AND BOARDS

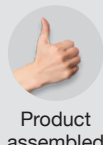

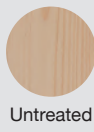

We often talk about the satisfaction of a job well done, but very little about how we do it. Our trestles and tabletops, for example, are simple furniture developed from the perfect combination of practicality and aesthetics.

Every job is a world and every trestle is a range of possibilities. We provide the quality and the experience, the intended use is left to the user's choice and imagination.

WORK TRESTLES

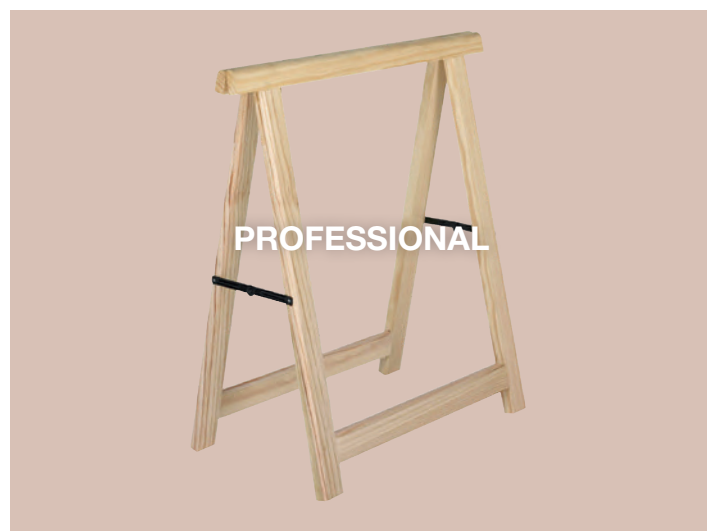

Just like each task requires a specific tool, each professional needs a special easel. This is the reason for the variety in the designs of our easels - our speciality.

II

ORDER AND PERSONALITY

SHELVING AND WALL SHELVES

Every object we keep in our home, office or work area tells a story. Our shelf space and wall shelves are designed to give that character to spaces, placing on them everything that identifies us or simply adds decorative value to the room.

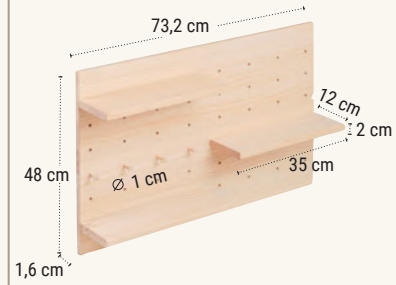

Our furniture evokes stories, memories and, ultimately, the personality of each individual. With our shelves we create the perfect place to display those photographs, books and objects that tell so much about us.

ORGANISATION AND EFFICIENCY

BOXES AND DRAWERS

Nothing provides more peace than having everything well organised. Always finding what you're looking for the first time is a rare pleasure, but with our boxes and drawer units, it can become a recurring theme.

How much time do we waste looking for things that we can't remember where we've last left them? Thanks to our furniture it is possible to organise all the necessary things, so that we can always have them located and spend our free time doing what makes us happy.

IV

PLEASURE AND GOOD TASTE

BOTTLE RACKS

A bottle of wine is synonymous with celebration, whether with friends, family, as a couple or by oneself. And to organise that pleasure are our bottle racks, simple, practical and ready to provide that touch of good taste and organisation to our bottles.

With these wine racks it is possible to transform those bottles that are left piled up in a corner of the house into a beautiful collection of wines, tidy and ready to be enjoyed.
